Special cooperation topics

- Conflict with Klientenbond chair

In July 2002 a registered letter of the Commission came, where they told ENUSP, that the final balance of the 1999-grant (Luxembourg congress) was not sent, that supportive papers was not sent, so the final payment was rejected, and the prepaid money was demanded back. This would have meant a loss of about 35000 Euro.

To our luck this letter came shortly before our Berlin board-meeting. Paul brought all the letters and e-mails, and in the night between the board-meetings Paul and Gabor and Kerstin and I went through all the material, and we found out, that the Commission had asked again and again for the final report and the supporting documents, but Clemens had always sent the staff again, the Commission had had already. We could convince afterwards, that the Commission had made a mistake, when they send all the time to the ENUSP-address at Klientenbond, and not to Berlin to the new address. This gave the chance to convince the leader of the antidiscrimination-department of the Commission in a phone talk, to give us another 3 weeks to bring all the papers, data, reports etc. In short time the Luxembourg report got ready, we organized the supporting documents, wrote a financial report, and saved a lot of money. As Paul, as it was told, was not allowed by Klientenbond to search and send all invoices to the ENUSP Desk to include them in the financial report, about 10000 Euro were lost. It was money, which was lent by the Klientenbond.

Afterwards there were discussions between Klientenbond, who wanted ENUSP to reimburse this money. It was on the one hand money, which was not reimbursed, because it was not told by ENUSP, for which purpose it was spent. This was not pos-

sible, because Clientenbond did not show the invoices. On the other hand it was money, which was paid for people from countries outside of the European Union, and this does not accord to the rules of the grant.

The new board of Clientenbond asked us to pay this money back, which we rejected. Clemens, supported by Paul Fijn, never had the task to spend money for issues not according to the contract. There was no reason for ENUSP board for suspect, because we trusted the Clientenbond, when their former board employed Clemens, and he was announced to us as an experienced accountant, supported by Paul, the treasurer of Clientenbond. Both had managed the expenses of the Luxembourg conference, the ENUSP board had had good reason to trust both that they did it in a competent way. Different money sources did not give any reason for sorrow. When the board got knowledge of the difficulties, it got active at once and help to rescue about 30000 Euro; a lot of outstanding money was reimbursed to Clientenbond, and more could have been saved, if the new Clientenbond board would have been cooperative with ENUSP desk and board in a minimum way. The announcement of a legal case was not answered any more, as the Clientenbond did not answer ENUSP board letters. So the contact between ENUSP and the Clientenbond chair is not optimal currently, which is quite sad regarding the support of the former Clientenbond.

- MHE: Negotiations about a common organisation (2002) to apply for European Commissions Coordination grants; failed, because MHE chair Leo de Graaf did not consider the special situation of ENUSP with the half board of citizens outside the European Union, whose travel costs would not have been reimbursed, and because of a dominating role of MHE.
